WGP Series

Efficient, oil-less direct-drive dual-discharge pumps produce greater flow pressure, so each can serve two water features simultaneously. Installed either vertically or horizontally, the corrosion-resistant submersible body is designed for non-potable, continuous operation.

Stainless Steel and Bronze

Our premium stainless steel and bronze pumps come in five models and are a favorite among the industry. These trouble-free pumps can be used in fresh, salt, chlorinated or brominated water and can even be used in hot water up to 110° F. These versatile pumps can be used submerged or in open air below water level for ponds, water gardens, medium to large fountains, water displays, waterfalls, streams and for aeration.
