## PondCare® AlgaeFix

Effectively controls many types of green or green water algae, string or hair algae and blanketweed in ponds that contain live plants. Controls existing algae and helps resolve additional algae blooms. Keeps ornamental ponds and water gardens clean & clear. E.P.A. Registration #8709-8.

Can be used in ponds with plants!

## PondCare® Microbial Algae Clean™

An Alternative Approach to Algae Control MICROBIAL ALGAE CLEAN is the first bacterial algaecide registered with the EPA (Environmental Protection Agency). This product contains patented bacteria to control green water algae in ponds with live fish and plants. The bacteria help establish and maintain a clean pond, free of algae. They also help improve dissolved oxygen levels and reduce noxious odors from the pond. Biological inhibitor of green water algae. Promotes a cleaner pond environment. Eliminates troublesome organic sludge and debris. Will not harm live plants or

fish.EPA Registration # 8709-10 Not available in Canada

# PondCare® Stress Coat®

A unique water conditioner that replaces the natural slime coating on the skin of pond fish when it has been damaged by handling, netting or other forms of stress. Instantly removes chlorine and conditions tap water. Contains Aloe Vera to help heal torn fins and skin wounds. Prevents the loss of internal fluids electrolytes. Protects damaged tissue of fish against external disease-causing organisms. Use when setting up a pond, adding new fish or changing pond water.

# PondCare® Quick Start

Live nitrifying bacteria to immediately start the pond cycle and support the biological filter. Ideal for Spring start up. Live nitrifying bacteria to immediately start the pond cycle and support the biological filter. Ideal for Spring start up. Proven to reduce ammonia & nitrite. Promotes a healthy environment for fish.

# PondCare® AmmoLock

Remove chlorine & chloramines from tap water detoxify ammonia, continually produced in the pond, by waste matter. Locks up ammonia, converting it into a form that not only is nontoxic to aquatic life, but serves as a source of nutrition for nitrifying bacteria in the biological filter. Eliminates ammonia stress and promotes healthy gill function of pond fish.

# PondCare® pH UP

Slowly raises the pH of pond water (making it more alkaline) without harming delicate pond fish or aquatic plants. Slowly neutralizes acid substances that cause low pH (pH of pond water is affected by mineral leaching, soil runoff & decomposing waste). A low pH can stress pond fish suppress the activity of the biological filter. Contains no algae-promoting phosphates

# PondCare® pH Down

Slowly lower the pH of pond water (making it more acidic) without harming delicate pond fish or aquatic plants. Slowly neutralizes alkaline substances that cause high pH (pH of pond water is affected by mineral leaching, soil runoff & decomposing waste). A high pH limits the ability of aquatic plants to absorb necessary nutrients. Contains no algae-promoting phosphates.

# PondCare® Chlorine & Heavy Metal Neutralizer

Instantly neutralizes chlorine, copper, lead and zinc, as well as other heavy metals found in tap and well water, all of which may be toxic to fish and plants. One ounce treats 600 US gallons of pond water.

# PondCare® Simply-Clear

A bacterial based pond clarifier that quickly clears murky, cloudy water and keeps it clean and clear through natural bacterial action. This triple action formula acts fast - clears pond water and breaks down sludge and offers a long term solution to un-clear pond water.

# PondCare® Accu-Clear

Maintains crystal-clear pond water. Quickly clears cloudy pond water. Helps filters function more efficiently. Works by causing tiny suspended cloud particles in pond water to clump together. The clusters quickly fall to the bottom. Use Pond Zyme Plus or EcoFix along with Accu-Clear for incomparable pond cleanliness.

# PondCare® Phos-Out

As the fish waste and uneaten food decompose, phosphate is released as inorganic or reactive phosphate into the water. Reactive phosphate causes unclear water conditions in your pond. Use of PHOS-OUT will remove the needed reactive phosphate resulting in clear pond water. Removes excess phosphate that cloud pond water. Helps to restore and maintain the natural balance of pond water

# PondCare® Barley Clear

Barley Clear is a highly concentrated suspension of natural barley and peat plus natural activators that quickly unleash the power of barley and peat into the water. Phenolic compounds found in the Barley naturally clears the pond. Barley Clear also helps maintain the natural carbon balance, which stabilizes water quality and maintains clear water. Clears water naturally. Clears murky water. Contains natural clarifiers

# PondCare® Ecofix

Makes pond water clean and clear. Breaks down dead algae. Increases the concentration of dissolved oxygen in pond water. Helps create a healthy ecosystem for pond fish. Can be used in ponds containing salt.

# PondCare® Melafix

Antibacterial remedy for the treatment of koi and goldfish diseases including eye cloud, mouth fungus and fin & tail rot. All-natural antibacterial remedy rapidly repairs damaged fins, ulcers and open wounds. Use when adding new fish to the pond. Safe for snails and other invertebrates. Will not harm aquatic plants, affect the pH or adversely affect the biological filter.

# PondCare® Pimafix

All-natural formula rapidly treats fungal infections on body and fins of pond fish. Also treats internal and external bacterial infections. Pimafix has been formulated to work in combination with Melafix to enhance effectiveness against fish diseases

# PondCare® Aquatic Plant Food Liquid

Formulated to feed all floating plants, such as Water Hyacinths and stimulate lush green growth on all aquatic plants. Benefits bog and marginal plants, such as iris and lobelia. Will not stimulate algae blooms. Use weekly during the growing season

# PondCare® Aquatic Plant Food Tablets

Provide essential nutrients and trace elements needed by pond plants to ensure non-stop blooming. Tablets contain iron for lush, green growth and boron to promote flower formation. Keeps water lilies blooming all season long. Stimulates lush foliage and beautiful blooms of all aquatic pond plants (hardy tropical plants and marginal and bog plants).

# PondCare® Plant Nutrient Spray

Plant nutrient spray is a unique and easy method to fertilize pond plants. The product comes in an easy to use spray form. Plant nutrient spray provides all essential nutrients to nourish plants for strong and healthy growth. Promotes healthy leaves and bigger, brighter blooms or water lilies and all flowering pond plants. Encourages development of healthy leaves, stems and roots. Promotes healthy and lush foliage. Safe for use in ponds containing fish

# PondCare® Aquatic Planting Media

Aquatic Planting Media is an aquatic plant soil comprised of a unique blend of natural minerals, including zeolite, which provides a clean, easy to use planting media for water gardeners. It is recommended for all potted aquatic plants, and will not change pH or color the pond water.

## Pond Fish Food

SUPERIOR PELLET DIET FOR ALL POND FISH

CLEAN & HEALTHY WATER

- High protein utilization produces less waste
- Natural Zeolite to reduce Toxic Ammonia

SUPPORTS IMMUNE SYSTEM

HELPS ENHANCE GROWTH & COLOR

[LEARN MORE](#)

## Cool Water Food

SUPERIOR PELLETS DIET FOR COOL WATER UNDER 65°F

For water temperature: From 41 to 65°F

CLEAN & HEALTHY WATER

- High protein utilization produces low waste
- Natural Zeolite to reduce Toxic Ammonia

HELPS BOOST IMMUNE SYSTEM

RICH DIGESTIBLE CARBOHYDRATES

## PondCare® Fish Feeder Block™

[LEARN MORE](#)

Floating sticks bring fish to the surface and soften quickly for easy digestion. High-carbohydrate, low-protein diet specially formulated for water temperatures between 42 and 70 degrees Fahrenheit. Low-protein formula reduces ammonia produced by fish waste. Contains spirulina algae to intensify fish color & stabilized vitamin C to help maintain the immune system. With natural ingredients, PondCare foods help maintain clearer, cleaner water.

## PondCare® Summer Staple Premium Pellets

A high-protein diet, specially formulated for feeding pond fish when water temperature is above 65 degrees Fahrenheit. Designed especially to feed pond fish when the water temperature is warm, a time of rapid growth & spawning, activities requiring a diet rich in protein. Contains spirulina algae, chitin, and carotene to develop vibrant fish color

## PondCare® Summer Staple Floating Pond Sticks

Floating sticks bring fish to the surface for easy viewing. High-protein diet is specially formulated for water temperatures above 65 degrees - a time of rapid growth and high activity that requires a protein-rich diet. Contains spirulina algae to intensify fish color and stabilized vitamin C to help maintain the immune system. Sticks soften quickly for easy eating and digestion, helping maintain clearer, cleaner water.
